optiSERV hybrid® FLEXIBILITY BUILT INTO A

Unique and elegant, the OptiServ Hybrid® offers the benefits of electronic touch-free dispensing as well as the convenience of mechanical dispensing when desired. In either mode, the OptiServ Hybrid® delivers a single pre-measured towel that encourages users to take only what is needed to reduce waste, making it ideal for office buildings, colleges and universities and high-traffic washrooms.

ELECTRONIC TOUCH-FREE DISPENSING

Touch-free operation ensures you touch only your personal towel, which is particularly important in public restrooms, food preparation areas and healthcare facilities where preventing cross contamination is essential. Touch-free service meets the demand for improved hygiene and is perfect for today's automated washrooms. The OptiServ Hybrid® does not require external electricity or wiring so it can be located virtually anywhere.

MECHANICAL HANDS-FREE DISPENSING

The electronic/mechanical dual functionality of the OptiServ Hybrid® is ideal for those patrons who prefer mechanical operation. Mechanical operation extends battery life and assures dispenser functionality if the batteries require replacement. An easy-to-use emergency feed bar is conveniently located beneath the dispenser.

SIMPLE INSTALLATION AND MAINTENANCE

Installation is a snap with support for a variety of installation patterns designed into the dispenser. A built-in level eliminates guesswork during installation, and a reversible cover offers flexibility in installation. The translucent side-hinged door makes for easy loading and allows maintenance staff to see at a glance when it is time to refill. Should service be required, the dispensing cassette can be replaced without removing the dispenser from the wall.

ADA Title III Compliant

The OptiServ Hybrid® is ADA Title III compliant when installed according to the guidelines outlined in the ADA Standards for Accessible Design. Paper is easily dispensed with one hand, with less than 5 lbs. of force and without tight grasping, pinching or twisting of the wrist.

A FUNCTIONAL AND ATTRACTIVE DESIGN

The OptiServ Hybrid® offers flexibility

ELECTRONIC OR MECHANICAL OPERATION The OptiServ Hybrid® offers both electronic hands-free and mechanical dispensing to suit user preference. A single pre-cut towel is dispensed with a wave of the hand, a pull on the exposed towel, or press of the emergency feed bar

DUAL HINGE COVER The reversible cover can be installed to open from the left or right, increasing the options for placement

CUSTOMIZABLE Available in five translucent colors to complement any facility's design, the OptiServ Hybrid® can even be imprinted with a company name or logo for a unique, coordinated washroom experience

The OptiServ Hybrid® is environmentally preferable

GREEN SEAL™-CERTIFIED TOWELS A variety of 100% recycled Green Seal™-certified towels are available in lengths of 425, 600, 800 and 1,000 feet

INNOVATIVE TRANSFER ROLL A built-in transfer roll feature eliminates stub roll waste and reduces service interruptions; a new roll starts only after the stub roll is depleted

CONTROLS USAGE Metered dispensing of one pre-cut, pre-measured towel discourages waste

The OptiServ Hybrid® controls costs

HIGH-CAPACITY ROLLS High capacity supplies of up to 1,000 feet ensure uptime and reduce maintenance costs

PRE-SET TOWEL LENGTH The OptiServ Hybrid® delivers an 11" towel with each use to reduce waste and control cost

LOCKING COVER Locking cover prevents pilferage and waste

MAINTENANCE AT A GLANCE The translucent cover saves maintenance time, as staff can see at a glance when it is time to refill the dispenser
