

STOKO REFRESH[®]

Food Handlers' Foam Wash

Foam gives a rich and creamy lather, which provides a luxurious hand washing or hand sanitizing experience.

Description

STOKO Refresh Foam Food Handler's Wash has great lather, is gentle to the skin even with everyday use and contains no dyes or fragrances. A new foaming cap with every cartridge ensures full-bodied foam with every pump and no clogs. The Food Handler's formula with 0.5% Triclosan removes and kills common germs and bacteria.

The efficiency of the foaming pump helps to give a cost savings. Each activation of the pump releases 0.4ml of soap compared to 1-1.5ml in conventional systems. This reduction can amount to end-user savings of over 40%. Cost comparison documentation can be provided upon request.

Directions for use

- Pump foam in palm of hand and wash thoroughly.
- Rinse thoroughly with potable water after washing.

Skin Compatibility

Under conditions of a Human Patch Test, no evidence of primary irritation or allergic hypersensitivity was found. No negative reactions occurred after 24, 48 and 72 hours.

Ingredients

Active Ingredient:
Triclosan

Inactive Ingredients:

Water
Propylene Glycol
Sodium Citrate
Citric Acid
Sodium Laureth Sulfate
Sodium Cumenesulfonate
Cocamidopropyl Betaine
Methyldibromo Glutaronitril
Phenoxyethanol

Stoko Refresh Food Handler's Foam Wash has also been reviewed and tested by NSF (National Sanitation Foundation) for the Chlorine Equivalency Test by AOAC 955.16 and found to pass this test making it suitable for use as a hand wash and sanitizer in food processing.

Stoko Refresh Food Handler's Foam Wash is registered with NSF and included in their published list of approved products for use in food processing in direct contact with food.

Storage Information

STOKO Refresh can be stored in a closed container for at least 30 months at room temperature.

All STOKO® Skin Care products are tested for stability at temperatures between 23°F and 104°F. When tested at temperatures below 41°F and above 86°F, the products begin to fluctuate in viscosity. Hand cleaners may become cloudy or freeze partially at temperatures of 32°F or below, however, they are usable after thawing.

Additional Information

Occupational skin irritation, frequent washing or harsh climates can lead to dry, rough and chapped skin. This condition can result in irritation/rupture of the outer layer of the skin which impairs its natural protective function. To regenerate damaged tissue after work, the skin should be regularly treated with Stokolan or fragrance-free Stoko Vitan Lotion. In doing so, the skin is replenished with moisture, lipids and hydrophilic nutrients. People who already have extremely rough or very dry skin are advised to use a before-work cream with a high oil content. Contact Stockhausen or its appointed distributors for advice on selecting the appropriate products.
