STOKO REFRESH® Hand, Hair & Body Foam can be stored in a closed container for at least 30 months at room temperature.

All STOKO® Skin Care products are tested for stability at temperatures between 23°F and 104°F. When tested at temperatures below 41°F and above 86°F, the products begin to fluctuate in viscosity. Hand cleaners may become cloudy or freeze partially at temperatures of 32°F or below, however, they are usable after thawing. For optimum dispensing performance, keep from freezing temperatures.

### **Additional Information**

Occupational skin irritation, frequent washing or harsh climates can lead to dry, rough and chapped skin. This condition can result in irritation/rupture of the outer layer of the skin which impairs its natural protective function. To help regenerate damaged tissue after work, the skin should be regularly treated with Stoko Lotion, Stokolan or Stoko SkinRelief. In doing so, the skin is replenished with moisture, lipids and hydrophilic nutrients. People who already have extremely rough or very dry skin are advised to use a before-work, barrier-like cream with high oil content. Contact STOKO Skin Care or its appointed distributors for advice on selecting the appropriate products.
